CompoCloset™
Better Toilets for People & Planet

BUYER'S GUIDE

Three waterless toilets. One footprint.

No water, no chemicals, no dump points. Built for caravans, campers and off-grid.

Cuddy™ Lite $1,450

BEST FOR
Weekenders and simple setups

- All the benefits of a Cuddy, without the fan or agitator
- Drop a compostable bag in the solids bin, lift out and done
- Urine diverting: liquids and solids kept apart, so no smell
- The lowest-priced way into the range

Our Best Seller

Cuddy™ $1,795

BEST FOR
Longer trips and full-time travel

- A genuine composting toilet with a manual agitator
- Largest drop zone in its class
- 14.7 L solids (2–3 weeks full-time for two) · 6.5 L liquids
- 12V fan: vent through the wall, or no drilling with the Venting Carbon Filter

World First

S1 Dry Flush $2,795

BEST FOR
Flush-style ease, with nothing to compost

- World's first separating sealing toilet: heat-seals solids in a bag
- Seals solids only, so fewer bags (liner pack ≈ 60 flushes, $55)
- No external venting needed
- Runs on your van's 12V: hardwire, or cigarette / Anderson plug

Your composting questions answered

Does it smell?
No. Keeping liquids and solids apart stops the smell.

How often do I empty it?
Cuddy solids: every 2–3 weeks full-time for two people, much longer if you use other facilities on your trip. Liquids: a 6.5 L bottle.

Does it really compost?
Yes, and you get the benefits straight away.

All our range is installable or portable

Accessories

Venting Carbon Filter · no drilling	**$240**
External Venting Kit · through the wall	**$245**
Bamboo Seat Cover · seat, step or table	**$220**

Never locked in

Switch styles any time

Cuddy or Lite → S1. Fit the S1 Dry Flush Adapter Kit ($1,495) to make it a sealing toilet.

S1 → Cuddy Lite in seconds. Lift out the sealing unit for an instant backup on the road.

S1 → Cuddy. Add a retrofit kit and it becomes a full composting Cuddy.

All three models

422mm (H) × 386mm (W) × 432mm (D), the same footprint, so they fit the same space · 2-year warranty · free shipping Australia-wide · Local support

How a Cuddy™ works

Three simple steps

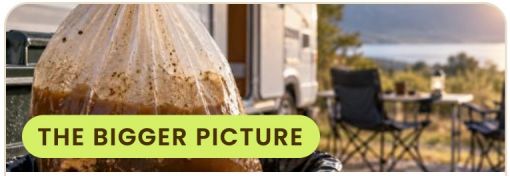

1. **Separate.** Urine is diverted at the front into its own bottle. Solids drop into the bin behind.
2. **Mix.** A turn of the agitator mixes solids with a composting medium and lets air in.
3. **Dry and vent.** A small 12V fan draws air through the bin and out, keeping it dry and odour-free.

GETTING STARTED

Which toilet is right for you?

Cuddy, Cuddy Lite or S1: a quick guide to choosing.
